Count Dooku,

I am writing to you today to express my all endearing support and respect for The Seperatist cause. I also come to you with a business proposition. Here on Mon Cala we the Quarrens have found an abundance of Hypermatter. With this new found abundance the Quarren will be able to be your number one supplier for hypermatter. There will no longer be the need for the continuous search for the next planet containing hypermatter, Quarren scientists estimate that there are about 10,000,000 barrels. This is enough to last two lifetimes. To complete a project like this we the Quarren people ask for your help. I ask you for a small loan to purchase equipment necessary for drilling and extracting and then help to obtain the whole planet of Mon Cala. We see this as necessary and believe it will be important to full extraction of the hypermatter, as a large portion is located under Mon Calamari land and territory and the Mon Calamari have been longtime supporters of the republic. With this new found alliance the Quarrens can help The Seperatist movement reach their goals much quicker than thought before. I am hopeful that this proposition will work out well for the both of us.

Yours truly,

Chieftain Nossor Ri

Representative of the Quarren people MARCH 22 BBY
